

TEATRO DEL INSTITUT FRANÇAIS (THE THEATER AT THE INSTITUT FRANÇAIS)

There are many reasons why the flamenco world acknowledges the important role France has historically played in flamenco's development.

France has helped universalize an art form that now belongs to all humanity, adding a perspective that is completely devoid of local clichés.

Our flamenco art continues to receive preferential treatment in France, and one such evidence of this is France's participation in Suma Flamenca for the second year in a row. Two of the shows scheduled during the festival will take place at the theater in the Institut Français in Madrid.
